

# National Webinars Age Services Industry Forums

In response to COVID-19 precautions our LASA Age Services Industry Forums have moved to an online webinar platform.

These updates are designed to provide solid guidance for managers of age services—offering credible information and valuable insight to support positive change. Held across Australia, these forums bring you practical hints, tips and tools to optimise the performance of your business.

The online interactive sessions will delve into the current state of the age services industry, and provide valuable information about the latest in: employment relations, residential care, home care, retirement living and seniors housing. You will learn about important legislative changes that affect your business operations, and be kept up-to-date with important information on COVID-19.

Open to LASA Members and non-Members, the forum program also provides an opportunity to hear from thought-leaders across the age services industry.

Join us at our next webinar and find the support you need to lead your business with confidence.
